

Lake County Frost Forecast

www.westernwx.com/lakeco

This forecast was made possible by generous funding from the Lake County Winegrape Commission, Farmers Finest & American AgCredit

Friday April 20, 2018 issued 3:00pm

Highlights: A much anticipated warming trend will persist throughout the region over the next few days. Clear skies and light winds tonight will allow lows to drop into the upper 30s & 40s with fairly strong inversions. Highs in the 80s this weekend & next week.

Frost Discussion: Building high pressure over California will result the several degrees of warming today while skies are sunny. Northwesterly winds will die down this evening. Temperatures should drop down into the 50s after midnight with most areas in the lower 40s to upper 30s by dawn. For tomorrow, further warming is likely with highs in the low to mid 80s expected. Similar weather besides a few high clouds will be on tap through early next week as high pressure remains overhead. Frost looks unlikely all week.
